

EM-1234 | Magnetic Mount

Description

The EM-1234 Magnetic Mount is designed to be a flexible mounting solution for our omni-directional antennas. The mount can be used in conjunction with our rugged omni-directional antennas, EM-6841 and EM-6843 or our standard, EM-6856. The EM-1234 can be mounted on any metal wall or vehicle roof using three magnetic feet. For flexibility, the EM-1234 can also be mounted onto any standard ¼-20 tripod stud. EM-1234 requires the use of a right-angle adapter with all antennas.

Mechanical

Dimensions:

Diameter: 11.1"

Height: 3.5"

Weight: 4.5lbs. – 1.25 lbs. without magnets

Magnets: 110 lb. pull force each
