

EM-1451 | Dual Antenna Tripod Adapter

Description

The EM-1451 Dual Antenna Tripod Adapter is an easy to install and remove mount for any standard ¼-20 tripod. The mount itself is designed to fit with any of the rugged omni-directional antennas, EM-6841 and EM-6843 as well as a whip antenna, EM-6500-1 and EM-6501-1. The antennas can be mounted and operated separately or in tandem.
